Comments:

- WBC mildly elevated · consider clinical correlation for infection or inflammatory process.
- Platelet count below reference range · recommend repeat CBC in 2-4 weeks.
- Fasting glucose elevated · consistent with pre-diabetic range; consider HbA1c testing.
- eGFR 58 mL/min suggests Stage 3a CKD · recommend nephrology referral if persistent.
- Lipid panel indicates significant dyslipidemia · lifestyle modification and statin therapy should be considered.
- TSH elevated · subclinical hypothyroidism; recommend Free T4 and repeat TSH in 6-8 weeks.
